

TRAINING CONCEPT

MODULAR SEMINAR STRUCTURE FOR YOUR MAXIMUM TRAINING SUCCESS

specialism (2) and our product area (3) - these are the three pillars that make up each of our individual product training courses.

This seminar structure enables you as a participant to select the right training module for your personal needs.

This training module then consists of two modules that build on each other: Basic and specialised module.

INDIVIDUAL TRAININGS

Would you prefer to be trained at your own company?

Would you like to familiarise yourself with a specific focus of our products or a mixture of the training modules we offer?

Are you interested in training for a complete system? Or do you have a specific application at your premises and would like to be trained directly on

NO PROBLEM FOR US!

You set your own priorities and we create the theoretical and practical content. We will then come to you with all the necessary training equipment or you can use our training rooms.

FAQs ABOUT YOUR PARTICIPATION

The **DATES** of the individual training courses can be found on our homepage at dinse.eu/academy You are also welcome to enquire about the dates via e-mail to akademie@dinse-group.com or by calling +49(0)40-65875-0.

We will be happy to provide you with the COSTS of the individual seminars on request. In addition to the seminar itself, this includes catering, a certificate of attendance and training documents. The fees are per participant. The costs for travelling, accommodation and evening meals are to be paid separately for each participant.

A learning success check is carried out at the end of the training courses. Successful completion of the course is confirmed with a CERTIFICATE.

In order to provide holistic and personalised support, our seminars are held in SMALL GROUPS of two to a maximum of six people.

The DURATION OF A SEMINAR depends on the subject area and scope of the content. Detailed information on the duration can be found in each training description.

You will receive the appropriate TRAINING **DOCUMENTS** to accompany your seminar. In addition to the presentations, these include the current flyers for your training area and the corresponding operating instructions.

We want to offer you long-term added value with our training courses. That is why we attach great importance to holistic consulting in our training concept. An important part of this is also the SUPPORT AFTER YOUR SEMINAR. If any questions arise in practice, we will continue to be at your disposal. We will always keep you up to date: If you wish, we can also send you product information, new products or technical changes to your training area after your training.

All seminars are held in German or English. On request, our training courses can also be translated into other foreign LANGU-AGES. Please contact DINSE AKADEMIE directly to discuss the individual options.

TRAINING CONCEPT

2023

DINSE is your dependable partner for the entire welding process. Contact us and schedule an appointment for consultation today. Together with you we will find the best solution for your application.

WELCOME TO THE NEW DINSE ACADEMY

With the move to our Norderstedt site and the opening of our brand new ACADEMY premises, we have also given our training concept a new look.

However, our claim has remained the same: Comprehensive knowledge transfer for the individual needs of the participant. The fulfilment of this claim is also reflected in the room layout: our academy is specially equipped for manual and automated welding.

In our product experience world, you will gain a detailed insight into DINSE products. Our team of instructors will teach you the theoretical basics in small groups in our modern training rooms.

What you have learned is then put into practice at our fully equipped manual workstations in the application centre. Industrial robots are also available for all training courses focussing on automation in order to gain practical experience.

EXPERT KNOWLEDGE IN THEORY AND PRACTICE

The product training courses are geared towards the daily tasks and challenges of our participants.

We differentiate between three areas: User technology, service seminars and training for sales staff.

Are electric arcs a daily part of your work? We look forward to welcoming you as a participant in our application technology training courses. Familiarise yourself with all the technical details of our products. Become an expert in the selection and practical use of our equipment for any welding application.

Are you a problem solver? Our service seminars give you the tools you need in case something doesn't work. Become a product specialist and learn how to diagnose faults. This will enable you to carry out professional repairs yourself at any time.

Are you a real sales hero? Our sales training courses prepare participating teams for the successful consultation and presentation of DINSE welding systems and impart expertise in the targeted marketing and sale of the products.

MODULAR STRUCTURE MAXIMUM SUCCESS

Each training course consists of a basic module and a specialised module. The product-specific knowledge base is created in the basic module. This part of the training can be conveniently completed online for many of our training courses. This saves you time and effort.

The specialised module takes place at our DINSE ACADEMY premises in Norderstedt and deals with the subject-specific, practical details of your training.

Each seminar is intensively supervised by our DINSE experts. Personal contact and clarification of your questions are particularly important to us. BASIC MODULE
PRODUCT KNOWLEDGE

SPECIALISED MODULE
PRACTICE UND DEEP DIVE
